Dear Parent or Guardian,

In our current mySci Unit, Change Over Time, students are exploring plant and animal life cycles. Along with this, inherited traits and camouflage are discussed. The students grow different kinds of herbs and discuss similarities and differences in the life cycles. The students model how a group of organisms might change in appearance over time.

School Home Connections

This unit highlights different kinds of plants and animals. Field trips to the Missouri Botanical Garden, nurseries, dog shelters, the zoo or science center all would relate to this unit.
