Where do seeds come from?

Any part of the plant that contains the seeds is known as the _____.

Challenge a family member to see who can come up with more examples of fruits. List some of the most interesting examples below. *Be sure to think about foods we consider to be vegetables but are actually fruits!*

With permission, go on a seed search in your kitchen. Find at least two different fruits and locate their seeds. Use the chart below to make some scientific observations.

Name of fruit	Drawing or sample of seeds
Number of seeds	
Properties of seeds
